## 1ST INTERNATIONAL CONFERENCE IN AQUACULTURE

(SIAQUA2019)

« Issues and Perspectives »

10 - 12 December 2019

### Preamble

The first international seminar in aquaculture "Issues and Prospects" is organized by the faculty of natural sciences and life, Kasdi Merbah university, Ouargla, Algeria.

Its aim is to bring together national and international stakeholders in the aquaculture sector to discuss solutions to the challenges facing the sector in Algeria, sharing ideas and experiences worldwide.

It will bring together all players in the sector: scientists aquaculture (researchers and academics), professionals, policy makers and equipment suppliers.

Preliminary Speeches, original research papers and posters will be presented. The seminar will also provide exhibitors with a space to present their products and services.

The best papers presented will be selected for possible publication in an indexed journal: Algerian Journal of Arid Environment « AJAE ».

### Conference Topics

- Biology and ecology of species in aquaculture interest
- Nutrition and Aquaculture Feed
- Aquatic animal diseases
- Biotechnology and uses of aquaculture products
- aquafarm creation methods and techniques
- Pollution and water management in aquaculture
- Sustainable and organic aquaculture

### DEADLINES

Abstract submission: 31/07/2019  
Acceptance notification: : 15/09/2019
